If you have updated to Windows Internet Explorer 8 or 9 and you are having trouble viewing the following table at the top of the screen, you may need to use Internet Explorer in "compatibility" mode:

| Home page	Take exam	My results	Management

Here's how:

1. Start Internet Explorer 8 or Internet Explorer 9.
2. On the **Tools** menu, click **Compatibility View Settings**. If the **Tools** menu is not displayed, press ALT to display the **Tools** menu.

If **Compatibility View Settings** is not available, the network administrator may have used a Group Policy setting to configure the options for you. Contact your administrator or the help desk.
3. Click to select the **Display all websites in Compatibility View** check box, and then click **Close**.

Our apologies for the inconvenience.
